PK- NQTC/NQTCA Packing Instructions

Shipper must ensure compatibility with all packaging materials and follow all appropriate transport regulations. For air shipment of liquids, containers must meet pressure, secondary closure and leak-proof liner requirements (See IATA DGR Section 5 / ICAO TI Section 4 / US 49 CFR 173.27). Deviations from any part of this instruction may void the UN certification. Please consult 49 CFR for United States record retention requirement. If further information is required, contact ICC Compliance Center at 1-888-442-9628.

</tr>
<tr>
<td>Maximum Specific Gravity of Liquids</td>
<td>1.8</td>
</tr>
<tr>
<td>Lid closure is to be even with top of can</td>
<td></td>
</tr>
</tbody>
</table>

Assembly:

1. Set up outer box by folding in bottom interlocking-flaps and seal center seam with one (1) strip of 3M #375,48 mm clear tape extending beyond each edge by at least 2”(inches).
2. Assemble the die-cut insert for 1 can, with two flaps pointing up and two flaps pointing down and place it over bottom flap-ends of box. (See Figure 2).
3. Do not completely fill inner container with liquid. Leave sufficient space in container for liquid expansion. (See 49 CFR 173.24(h) or IATA 5.0.2.8).
4. Using a paint can closer, secure lid completely and evenly on can.
5. Secure four metal clips (spaced evenly apart) or one (1) Ringlok on can/lid assembly. (See page 2 for ringlok assembly) Make sure each clip snaps completely in place with “double hook end” over outer rim of can.
6. Place assembled can in an upright position in insert/box assembly. (See Figure 3).
7. Fold top interlocking flaps of box and seal center seam as described above in step one. (See Figures 4 and 5).
8. Mark and label each package in accordance with the appropriate regulations. At least one (1) set of UN markings and two (2) orientation arrows must be shown on each package.
Ringlok® Instructions
(RL-CJ7 & RL-CJ8)

ASSEMBLY

1. Place the Ringlok® on the paint can.

2. Using the palms of both hands, concentrate on one end of the ring and press firmly. (This will result in the ring hooking the outer rim of can.)

3. Using palms of both hands, continue to “firmly” press the ring into place and work both hands around the perimeter, until the ring is completely applied.

4. The ring is properly applied when the ring hooks below the can’s rim completely around the perimeter.

REMOVAL

1. Pry the ring in an upward position using two thumbs concentrated on one area until the ring releases from the can’s rim.
